PROFILE

Creative and detail-oriented front-end developer with a passion for crafting seamless and visually engaging user interfaces. Experienced in building responsive, high-performance websites and applications. Adept at collaborating with cross-functional teams and utilizing the latest web technologies to drive project success and exceed client expectations.

WORK EXPERIENCE

REACT DEVELOPER

Cognizant Technology Solutions   2020-2024

- Hands on experience in developing customer facing applications using front end frameworks like React.
- Extensively used React Hooks to handle application life-cycle processes and tested React components using Jest.
- Utilized Redux library for state management and Bootstrap to make UI design responsive and consistent across various devices.
- Optimized REST API calls to reduce load times resulting in a 15% increase in page speed.
- Increased application performance by 45% by optimizing the web components.
- Experienced in working with team to meet the requirements for Sprint in Agile Methodology

----

PROJECTS

- **E-commerce Application**

Built a dynamic e-commerce website using React.js and Express.js. Designed a responsive user interface with Tailwind CSS and implemented features like product filtering, sorting, and cart management. Leveraged MongoDB for efficient data storage and retrieval, ensuring smooth user experience.

- **Job Portal Application**

Built a job portal application using React.js and Tailwind CSS. Implemented features like job listings, search, filtering, and sorting. Designed a clean and responsive UI to ensure an intuitive user experience.
